

ALFRED NOBEL UNIVERSITY

Department of Global Economics

«Modern, high-quality and honest education»

**What do bachelors in International
Economic Relations study?
(set for 2020)**

Dnipro, 2020

Dear friends,

You have chosen one of the most promising specialties offered by the Alfred Nobel University - International Economic Relations. Firstly, the scale of foreign economic activity and the globalization of the modern world are constantly increasing. Nowadays, half of what is produced in Ukraine is sold abroad, as well as half of what is consumed, is produced outside of our state. As a result, the demand for specialists who will be known in international economic relations will only grow. Secondly, graduates of this specialty not only have a good knowledge of the economy (and therefore can take up any positions of economic importance), but also know the international peculiarities of its manifestation. Thirdly, compulsory knowledge of two foreign languages by the graduates is a qualification requirement which significantly expands the scope of activities they can be involved in and increases their competitiveness on the labor market.

In this publication, you can get acquainted with your curricula across the years of study. Please note that the list of disciplines consists of both compulsory for study and those that you choose for yourself (they are marked as selective disciplines in the plans). So, guided by your preferences and guided by the perceptions of the specifics of the future field of activity, you can build your own individual trajectory of training that is most relevant to your interests. You will be helped by the teachers from the department who will accompany you throughout the entire period of study.

The teaching process is provided by highly skilled teachers (Doctors and Candidates of Sciences) who work according to the European standards and latest techniques in classrooms with modern equipment. Practitioners with successful experience in the field of international economic relations are also involved in the educational process.

You can always contact me personally (room 3308) or email me at zadoya@duan.edu.ua if you have any questions about your studies at the University.

So we wish you a successful, interesting and useful training!

*Anatolii Zadoia,
Head of the Global Economics Department, Doctor of
Economics, Professor, Honoured Worker of National
Education of Ukraine*

First year

№	Course	Number of hours (ECTS credit)		Form of final assessment (continuous assessment CAS, final assessment FAS)
